New and Improved

The new 3.5KW and 6.5KW Villiers Generators feature Earth Leakage protection for operator safety combined with a circuit breaker which also acts as an on/off switch, and weatherproof covers on both of the 15 amp power outlets.

- low oil level shutdown protection
- low fuel and oil consumption
- clean power for electronic tools and equipment
- heavy duty anti-vibration mounts
- 2 pole / 3000 rpm

Petrol Generator Sets

10GF-G

The larger 9.5 KW unit can be mounted on four wheels for stability and easy movement as standard.

PVGS / 35W & PVGS/65W

On the 3.5 KW and 6.5 KW handles and wheels are standard for easy movement.

The 3.5kw 8hp petrol generator set with recoil start (model PVGS/35) will drive up to a 12" angle grinder as well as most other power tools used on farms or in the construction industry.

The 6.5kw 13hp petrol generator set is available in both recoil start and recoil/electric start and will do all the jobs above plus run electric air compressors up to 16CFM. It is an ideal size as a standby power source for households and workshops in times of power failure.

The 9.5 kw petrol generator is powered by a 20hp V Twin Cylinder engine developing 16hp at 3000 RPM (50hz) and is an ideal unit for the larger workshop, dairy or the shearing shed where a woolpress is used. (Earth leakage currently not available on 9.5 KVA).
