7 KVA and 12 KVA Silent Diesel Generators

for handy man and emergency stand by power for domestic use only

FEATURES

- The air cooled diesel engine with advantage of simple compact construction and light weight does not have the problems associated with water cooled engines such as water leaks freezing etc which lead to overheating. Maintenance is also simplified.
- The air cooled diesel engine is able to perform well in temperatures from minus 40 to up to 50 degrees centigrade.
- Fuel consumption of air cooled diesel engines is up to 16% less than the water cooled engines and also gives lower pollution and less harmful emissions.
